

TLV9022QDRQ1

Comparator Dual R-R I/P 2.75V/5.5V Automotive 8-Pin SOIC T/R

Manufacturer:	Texas Instruments, Inc
Package/Case:	SOIC-8
Product Type:	Linear Displacement Sensors
RoHS:	RoHS Compliant/Lead free W
Lifecycle:	Active

Inquiry

General Description

The TLV902x -Q1 and TLV903x -Q1 are a family of Automotive grade dual and quad channel comparators. The family offset low input offset voltage, integrated Power-On Reset (POR) circuitry, and fault-tolerant inputs with an excellent speed-to-power combination with a propagation delay of 100 ns. Operating voltage range of 1.65 V to 5.5 V with a quiescent supply current of 18 μ A per channel.

This device family also includes a Power-on Reset (POR) feature that ensures the output is in a known state until the minimum supply voltage has been reached and a small time period passed before the output starts responding to the inputs. This prevents output transients during system power-up and power-down.

These comparators also feature no output phase inversion with fault-tolerant inputs that can go up to 6-V without damage. This makes this family of comparators well suited for precision voltage monitoring in harsh, noisy environments.

The TLV902x -Q1 comparators have an open-drain output stage that can be pulled below or beyond the supply voltage, making it appropriate for low voltage logic and level translators.

The TLV903x -Q1 comparators have a push-pull output stage capable of sinking and sourcing milliamps of current when controlling an LED or driving a capacitive load such as a MOSFET gate.

The TLV902x -Q1 and TLV903x -Q1 are specified for the Automotive temperature range of -40° C to $+125^{\circ}$ C and are available in a standard leaded and leadless packages.

Key Features

Qualified for automotive applications

AEC-Q100 qualified with the following results: Device temperature grade 1: -40° C to 125°C ambient operating temperature range

Device HBM ESD classification level 2

Device CDM ESD classification level C6

1.65 V to 5.5 V supply range

Power-On Reset (POR) for known start-up

Precision input offset voltage 300 μV

100ns Typ propagation delay

Low quiescent current 16 µA per channel

Rail-to-Rail input voltage range exceeds the rails

Open-drain output option (TLV902x-Q1)

Push-pull output option (TLV903x-Q1)

2 kV ESD Protection
