

IXYX120N120C3

Trans IGBT Chip N-CH 1200V 220A 1500mW 3-Pin(3+Tab) PLUS 247

Manufacturer:	Littelfuse Inc
Package/Case:	PLUS247
Product Type:	Thyristors
Lifecycle:	Active

General Description

Manufactured through the state-of-the-art GenX3TM IGBT process and an extreme-light PunchThrough (XPTTM) design platform, these devices feature highcurrent handling capabilities, high-speed switching abilities, low total energy losses, and low current fall times. They have a positive collector-to-emitter voltage temperature coefficient, making it possible for designers to use multiple devices in parallel to meet high current requirements. Their low gate charges also help reduce gate drive requirements and switching losses. In addition to being avalanche rated, these devices have square Reverse Bias Safe Operating Areas (RBSOA) up to the breakdown voltage– a necessary ruggedness in snubberless hard-switching applications.

Key Features	Application
Optimized for 20kHz-60kHz switching	Battery chargers
Square RBSOA	E-Bikes
Short circuit capability	Tauru hallasta
Avalanche rated	Lamp ballasts
Ultra-fast anti-parallel diodes	Power inverters
International standard packages	Power Factor Correction (PFC) circuits
Advantages:	Switched-mode power supplies
Hard-switching capability	Uninterruptible Power Supplies (UPS)
High power density	Welding machines
Low gate drive requirements	rectang indennies
