General Description

EPM7192SQC160-10 is a specific model of a field-programmable gate array (FPGA) manufactured by Intel Corporation (formerly Altera Corporation).

Key Features

It has a capacity of 1,792 logic elements (LEs)

It operates on a supply voltage of 3.3V

It has a maximum frequency of 139 MHz

It has 32 embedded multipliers and 3,456 RAM bits

Application

Video processing and display

Industrial automation

Robotics

Medical equipment

Aerospace and defense
