General Description

EPM3128ATC144-10N is a model number of a programmable logic device (PLD) manufactured by Intel (now known as Altera).

Key Features

It has 3,000 usable gates.

It comes in a surface-mount package with 144 pins.

It operates with a maximum frequency of 10 MHz.

It has 128 macrocells and 36 I/O pins.

It supports 5V power supply.

Application

The EPM3128ATC144-10N can be used in a wide range of applications, including digital signal processing, memory control, and communication protocols.

It is commonly used in industrial control systems, medical equipment, and telecommunications equipment.
